Raats, P. A. C., Multidimensional transport of solutes in saturated and in unsaturated soils 7
Schoonderbeek, D., see Heringa, J. W. 127
Schuurman, J. J., Root and crop growth of oats as affected by the length of periods of high water-table 20
Sevink, J., see Bolt, A. J. J. 110
Sibma, L. & Th. Alberda, The effect of cutting frequency and nitrogen fertilizer rates on dry matter production, nitrogen uptake and herbage nitrate content 243
Smeets, L., see Vries, D. P. de 36
Stigter, C. J., see Birnie, J. 1
Verstraten, J. M., see Bolt, A. J. J. 110
Vries, D. P. de, L. Smeets & Lidwien A. M. Dubois, Hybrid Tea-roses under controlled light conditions. 4. Combining ability analysis of variance for percentage of flowering in F1 populations 36

Subject index

This index lists the key-words given with the summaries of the papers. The figures refer to the first pages of the papers, where the key-words are given

adsorption 7, 40
age at puberty 211
air temperature 63
altitude 78
black nightshade 199
breeding 36
broiler 147
carbohydrate content, soluble 97
chemical equilibria 40
Chloris gayana Kunth 185
clone 97
cold tolerance 63, 78
colluvium 110
combining ability 36
conception rate 211
copper 164
cupric ion activity 164
decay, production of 7
defoliation 185
depletion 135

diallel 36
diammonium hydrogen phosphate 147
dispersion 7
egg quality 29
embryonic survival 211
energy
– intake 211
– level, protein 29
environmental index 78
equilibria, chemical 40
F1 population 36
feed conversion 147
fertility 211
finisher 147
flowering ability 36
forage yield 63, 78
gilt 211
grain yield 63, 78, 156
grass 238
growth analysis 199
heavy metals 228
hen, laying 29
herbage production 243
highlands 63, 78
Hybrid Tea 36
inhibition 16
intoxication 16
irradiance, low 36
laying hen 29
leaching 228
loess 110
low irradiance 36
lysine 29
maize 63, 78, 238
metals, heavy 228
methionine 29
micrometeorology 1
micromorphology 110
molybdenum 16
natural radioactivity 40
nitrate 16
– contents 243
– reductase 16
N-nitrosamines 238
nitrogen application rate 243
nodal roots 20
ovulation rate 211
oxalic acid 127
P : N ratio 135
performance 29
phosphorus fractions 135
photography 127
planting, time of 78
production of decay 7
protein energy level 29
puberty, age at 211
'Quantimet' 127
quaternary 110
radioactivity, natural 40
rainfall 78
reflection, spectral 252
remote sensing 252
reproductive phase 97
restoration 135
Rhodes grass 185
root 97, 185
–, nodal 20
–, potato 127
– weight 20
rooting depth 20
Rosa 36
rose 36
rumen 16
saturated soils 7
sewage sludge 228
shade 199
shoot 185
– age 156
– growth 20
– productivity 156
silages 238
soil(s)
–, saturated 7
– sample 127
– slaking 252
– temperature 63
–, unsaturated 7
Solanum nigrum 199
soluble carbohydrate content 97
solutes, transport of 7
sorghum 63, 78
spectral reflection 252
starter 147
temperature 78
–, air 63
– measurement 1
–, soil 63
thorium complexes 40
time of planting 78
toxicity 164
transport of solutes 7
tropical vegetable 199
tungsten 16
unsaturated soils 7
urea 147
uranyl complexes 40
vegetable, tropical 199
vegetative phase 97

wheat, winter 156
winter wheat 156
yield
– components 156
– stability 63, 78
Zea mays 164
